## VOLUNTEER WORK

### 2-Year Church Mission

SAO PAULO, BRAZIL

2015-2017

## PROFESSIONAL SUMMARY

I am a software developer who's passionate about solving problems through technology.

## EXPERIENCE

### Junior Full-stack Engineer

Z REX | 2023-2024

- Wrote software for use by veterinary pathology labs and their clients.
- Full-stack development work using PHP (Laravel) on the backend, and JavaScript (Vue.js) for UI and Front-end development.
- Interfaced with a MySQL database during back-end development, including the creating and keeping of users, organizations, and their data.

### Junior Software Developer

FROZEN DESSERT SUPPLIES | 2022-2023

- Wrote software using TypeScript and Node.JS that handles thousands of orders per month, generating millions of dollars in yearly revenue
- Contributed to software to accurately keep inventory on thousands of products
- Developed a custom solution for pre-selling items while still avoiding overselling of inventory
- Worked extensively with Shopify's GraphQL Admin API
- Created internal APIs to be used with various inter-departmental tools, increasing ROI for the company's operations, and analytics

### Narrative Video Technician

BYU-IDAHO | 2017-2021

- Worked on promotional and story-driven video projects on a weekly basis
- Used modern video editing software, such as Davinci Resolve and Avid Media Composer, regularly
